

# ***STRUCTURAL DESIGN USING STEEL FIBERS***

## **Training Seminars and Workshops**

Sponsored by Helix West, Lafarge Canada, Helix Steel and Wicke Herfst Maver: all day training seminars and hands-on workshops focusing on the use of structural fibers in concrete.

World experts on fiber technology, Luke Pinkerton, CTO and Samhar Hoz, PEng, of Helix Steel will discuss the science of fiber design, testing methodology and the use of structural fibers in walls, slabs and bridge decks. Katherine Chevier, Quality Control Manager at Lafarge Concrete will discuss mix design and steel fibers.

Hands on workshops will allow all attendees to calculate Helix dosage by hand and using on-line tools.
